

From the **Horse's Mouth**

"In the new-world e-economy, it is not enough to cope with change, but effectively manage it. The thrust of change fundamentally demands capability, supported by effective mechanisms"

—LC Singh
president & CEO,
Nihilent Technologies

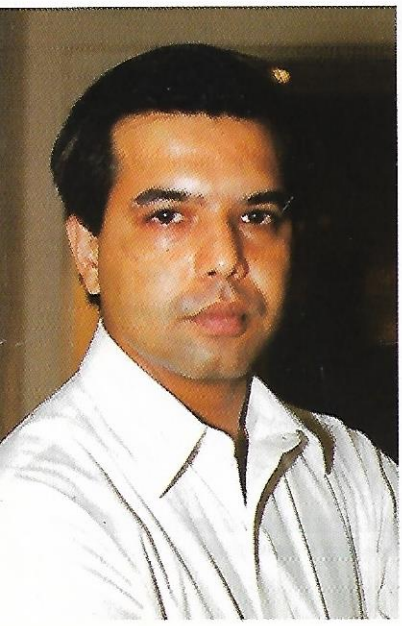

"At Celetron, we run a capital-intensive business and rank among the country's largest hardware exporters. A bulk of our orders come our way due to the cost advantage that we offer"

—ML Tandon
chairman,
Celetron India

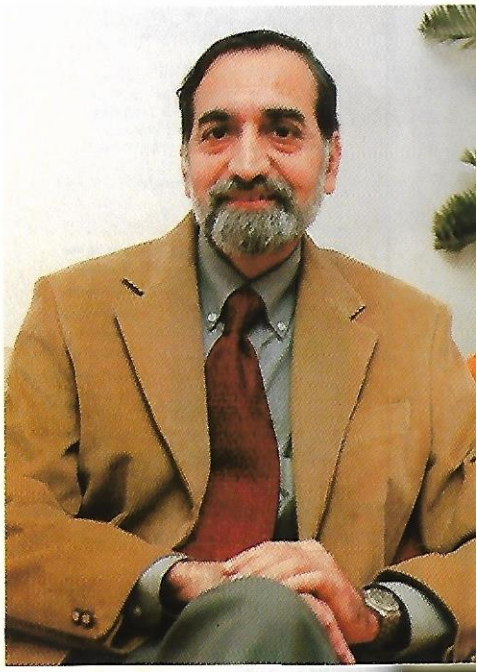

"With the industry becoming cohesive, the line between hardware and software is no longer very wide. I don't rule out a merger between Nasscom and MAIT sometime in the future"

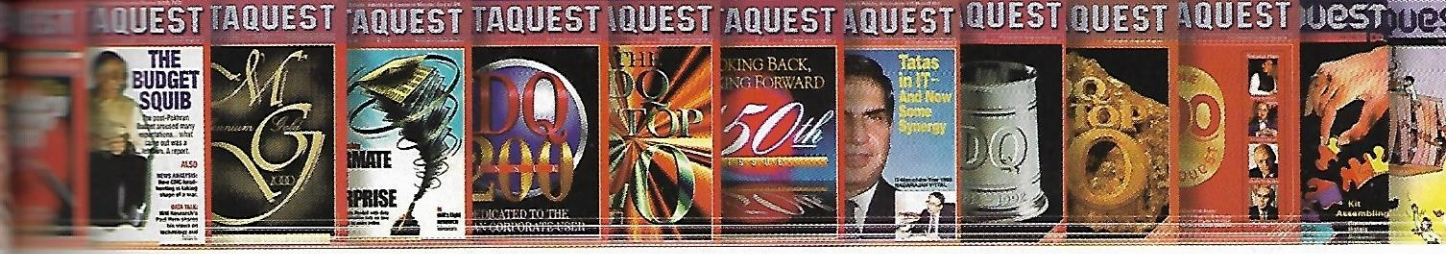

—Kiran Karnik
chairman, Nasscom

"We need to strengthen our relationship with counterpart associations across the globe to explore opportunities in other countries and reach the forecast of IT hardware exports to $25 bn by 2010—as delineated by the recently-concluded MAIT-Ernst & Young study"

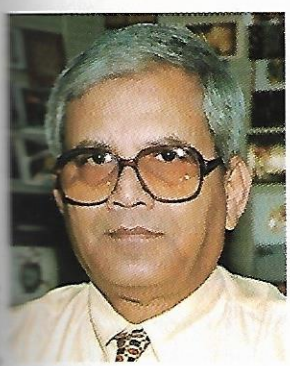

—Vinnie Mehta
executive director, MAIT

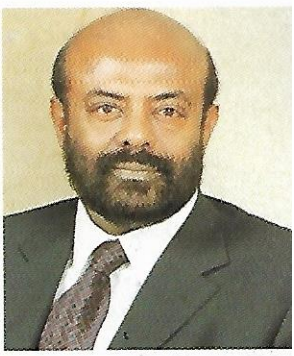

Shashi Ullal
former president and MD, HECL

Ullal worked for 42 years with the Indian IT industry, and was the first to take on the challenge of a new industry—the VSAT segment—and assumed office as president and managing director of Hughes Escorts Communications in July 1995. He developed this industry segment in India, one because of which his company maintains the early entrant advantage. Previous to Hughes, Ullal was with IBM for 19 years, and other major assignments were with DCM Data Products, Hewlett-Packard division of Blue Star Ltd, Modi Olivetti and Alcatel Modi. As president of the VSAT Service Providers' Association, he also raised the VSAT issue to facilitate access to Ku and C bands and foreign satellite connectivity. He is a member of the Telecom Committee of Ficci, Assocham and CII.

Shiv Nadar

25 years ago, when Shiv Nadar quit DCM to form Hindustan Computers Ltd in a one-room tenement, little did he realize that he would pioneer the growth of IT in India in every sphere—hardware, software and networking communications. Also that, in the process of running HCL, he and his company would be become the incubators for India's leading IT professionals and entrepreneurs. Today, he has moved on to the software side, with HCL Technologies, to make it amongst the top 10 Indian IT companies.

Sirjang (Jugi) Lal Tandon
CEO & chairman, Celetron

One of the earliest immigrants from India to Silicon Valley, he founded the Tandon Corporation in 1975, producing magnetic recording heads for floppy disk drives and becoming a leading producer of floppy disk drives. Prior to 1975, Jugi had worked at IBM, Memorex and Pertec. For his achievements in technology and business, he was also awarded an honorary doctorate degree overseas.

Sivasankaran
Sterling Computers

Sivasankaran launched the Siva PC at an unbelievable price of Rs 29,000 and took the bottom out of the market. That was to become a habit with Siva—he did the same in 1997—till he eventually faded out of the PC scene altogether.

SR Balasubramanian
chief information officer, Hero Honda

He is considered the person who turned IT cynics into IT believers within Hero Honda. With 27 years' experience in the field of IT, starting from Indian Oil Corp to AF Ferguson & Company, Balasubramanian joined Hero Honda Motors in 1990. Back then, he was involved in IT implementation, devising new IT policies and coping with the resistance to IT implementation. After a two-year break, he re-joined Hero Honda and helped install structured LAN systems and WAN links, connecting 21 locations and manufacturing plants. Employees were soon eager to be part of the network and the culture changed—and that made using SAP much easier. As things improved, Hero Honda made increased revenues and faster audits—thanks in part to Balasubramanian.

THE REVENUE CHART: 1984-2002

Company	84-85	85-86	86-87	87-88	88-89	89-90	90-91
1. Advance Technology Devices							
2. Aptech							
3. Celetron							
4. Cisco							
5. CMC				73	102	125	149
6. CMS							
7. Cognizant Technology							
8. Compaq							
9. DCM Data Products	11	16	22	24	28	35	42
10. Digital Equipment (India)						36	61
