Overll operations has improved significantly since last visit

Charles Dishman
Auditor
IBM, USA
May 5, 1995

Quality aspects are very satisfactory

Victor CF Leong
Senior Supplier Quality Engineer
Maxtor Peripherals (S) Pte Ltd
Sept 28, 1993

The Tandon Madras operation is a very viable manufacturing operation. The present princle products are Power Supplies& Voice Coils & HSAs.

Total work force is 350. The clean room is neat and appears to be relatively new. The process not fully not operational is well documented. The Engineers and Operator's appear to be skilled and enthusiastic in the approach to HGA and HSA manufacturing. The work force is experienced having previously manufactured HGA's for Seagate, HSA's for Syquest and for internal consumption fo maintain the centaur progres in India.

David Craft
Principal Engineer

I am pleased to advise that you have been selected as one of the suppliers of the next generation of power supplies for the IBM Commercial Desk Top Brand of personal computers..

IBM technical team from Boca Raton will work with you on the qualification schedule.

Thank you for your efforts in this regard and we look forward to working with you on this programm.

Lee R Stone
World Wide Procurement
IBM
March 28, 1994

There is a general improvement observed through the processes particularly wave soldering and component prep.

The run of Greenest forest results were satisfactory. The process enhancement appear to have improved the overall integrityt of the solder joints

Jose Antonio Rodriguez
Advance Procurement Engineer
Compaq Computer Corporation, Houston

This is to advise that Golden Systems sources all of its products from Ultra Tek Devices, who has facilities in both Bombay and Madras, India

Naren Bhansal
Director of operations
Golden Systems, Inc
July 15, 1995

Seagate Technology, Scotts Valley is the Corporate Headquarters for all divisions of Seagate Technology Corporation.I am a senior buyer and control all phases of choosing approved vendors and placing purchase orders for the commodities I am assigned.

I am currently reponsible for voicecoil that are installed in our Disk Drive products and have authorised not only Seagate Scotts Valley but also our divisions in Singapore and Thailand to purchase voice coils from the two of the facilities namely Tancom Electronics at Bombay and Modulaer Electronics at Madras.

The factories are performing satisfactorily in meeting the requirements of Seagate Technology and are all on our approved vendor list. At the end of June 1995 these facilities were visited by a number of Senior Quality Engineers (SQE) during our review cycle and were re-qualified. The next review will occur in January 1996.

We are planning for this relationship to continue forward and shall be using the mentioned facilities for similar programms and volumes that we are currently purchasing from them now.

Sam Lopez
Senior Buyer
Seagate Technology, Scotts Valley
June 30, 1995

Quality systems and management techniques have been improved extensively at Ultra Tek Devices Limited. in Bombay and Madras. This has been further enhanced by the addition of new manufacturing equipment. A readiness programm is ongoing now to assist in their goat to get ISO 9002 certified.

"Quality" is very much a message to everyone in the process and evidence exists with slsogans pasted in most of the process line. They are still going thru some improvement in their proces to ensure a closed loop, constant monitoring system is visible.

New equipments have been installed like Auto swquencers, Auto insert machines, water washing equipment. The current date gathering and reviewing techniques allow them to keeop control of the process with one day exposure incorporating a more real time response system which would increase awarenss of the process and conditions at all levels.

Expansions are there in the process, more improvement is seen, therefore we recommend Ultratek (Bombay & Madras) a status of a supplier.

Jose Antonio Rodriguez
Advance Procuement Engineer
Compaq Computer Corporation, Houston
October 13, 1994

On june 15, 1992 Compaq Computer Corporation announced a new line of Desktop PC's and Portable Computers. I would like to take this opportunity to thank all the employees of Ultra Tek Devices for their hard work and dedication in making this announcement possible.

Our announcement on June 15, was the largest product unveiling in the history of Compaq. At the beginning of this programme, both Compaq and Ultra Tek Devices Ltd were conforonted with an extraordinary challenge.Compaq needed to respond to market demand for a low cost desktop computer. Ultra Tek Devices needed to provide Compaq with a lost cost, high quality, reliable power supply in large volume for our desktop products. Wsith our June 15th announcement past us, it is evident that both Compaq and Ultra Tek Devices have succeeded.

Without Ultra Tek Devices committment to support Compaq on this programme, this announcement would not have been possible. Again, thank you for your support and hardwork on this project. Please keep up the good work!.

Glenn Dougherty
Purchasing Manager
Compaq Computer Corporation, Houston
June 22, 1992

We wish to thank you for the support given to us during our current fiscal year which will end June 30, 1995. We are expecting to atleast double our production requirements during the coming fiscal year for which we will require you to further expand your facilities in the interest of having your India plants participant in this growth.

Please thank all involved in the concerned effort for success in Bombay (India) Advance Technology Devices and Tancom Electronics.

We hope for continued growth further

Dan Miller
Vice President- Materials
Western Digital Corporation, Irvine
June 19, 1995

IBM PC Company intends to purchase a cariety of desktop power supplies during the balance of 1995. The total volume of such units are estimated to be very high like 130,000 units during the 3rd quarter and 170,000 units during calender quarter 4, 1995.

IBM encourages to secure guaranteed supply lines from its suppliers for such parts and components. Ultra Tek Devices is hereby authorised to use the IBM estimated usage figures set forth above when meeting with its suppliers as an indication that IBM represents a significant user of Ultra Power Supplies..

Ultra Tek Devices is authorised to show this letters to vendors, if required in order to offer evidence that Ultra Tek Devices has a significant relationship with IBM.

Robert H Shroyer
Golbal Commodity Manager
IBM PC Company
World Wide Procurement, NC

This is to state that Ultra Tek Devices Ltd, is a valued suppler to Compaq Computer Corporation. Ultra Tek Devices is a manufacturer of Power conversion devices used in products proeduced by Compaq and we depend on Ultra Tek Devices as a key supplier to meet our production demands.

Since our success is dependent on our suppliers performance, I ask that you extend Compaq Contract pricing and delivery for all volumes directly related to the manufacturing of Products specifically for Compaq.

Your full support will be greatly appreciated.

Thomas J Haysmer
Sr Commodity Manager
Compaq Computer Corporation, Houston
May 1, 1995

We are encouraged through your enthusiasm to get right products at right timings. We sincerely hope we will be able to layout mutually beneficial long lasting business relationship between two companies.

Akihiro Hirao
